PROFESSIONAL EXPERIENCE

IBM **Lowell, MA**
Senior Content Developer | Data & AI Sept. 2023 – Present

- Lead cross-functional collaboration with product teams, developers, and stakeholders to align documentation priorities with business goals and content KPIs.
- Drive content strategies for enterprise software experiences that improve usability and help users successfully navigate complex workflows.
- Identify and implement AI-driven content solutions that improve team productivity while enhancing content quality and user experience.
- Apply design thinking principles and user feedback to continuously improve the user experience for Business Automation Workflow and Cloud Pak for Business Automation content.
- Spear-head strategic initiatives to improve content architecture and scalability, including expanding DITA reuse and introducing animation-based learning experiences.
- Translate highly technical concepts from engineering teams into clear, user-centered content for both technical and non-technical audiences.

Content Developer | Digital Business Automation Feb. 2021 – Sept. 2023

- Partnered with subject matter experts and cross-functional stakeholders to define customer-facing content requirements for enterprise software products.
- Evaluated and improved product content for usability, accuracy, and consistency across multiple product releases.
- Applied content standards and editorial guidelines to modernize legacy documentation and improve content quality.
- Created reusable DITA-based content that improved consistency and scalability across product documentation.

Technical Content Developer | Cloud Architecture July 2020 – Feb. 2021

- Improved website usability by redesigning and optimizing customer-facing technical content.
- Collaborated with customer success and engineering teams to align documentation with evolving product capabilities and customer needs.
- Supported implementation and systems integration projects by developing clear documentation for diverse client environments.
